Summary

A passionate Full Stack Developer with a focus on building scalable and responsive web applications. Experienced in React.js, Node.js, Express.js, and MongoDB, with strong problem-solving and OOP skills. Dedicated to self-learning, building practical projects, and applying modern development practices.

Education

Bachelor of Science in Computer Science

University Name, 2021 – Present

Coursework: Software Engineering, Database Systems, Web Development, Artificial Intelligence.

Experience

Self-Driven Full Stack Development Experience (2023 – Present)

Gained practical development experience by working on MERN stack projects. Focused primarily on React for frontend development, along with Express.js, Node.js, and MongoDB for backend integration. Built multiple real-world projects to strengthen full stack development skills.

Projects

🌐 Personal Portfolio Website — HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB

Designed and developed a stylish and responsive portfolio website showcasing my skills, projects, and experience. Includes About, Skills, Home, and Contact sections with smooth UI/UX. (Live Link: [Add Link Here])

Weather Detection App — React.js (JSX), JavaScript, HTML, CSS

Responsive app that fetches real-time conditions and a 5-day forecast for any city worldwide.

Movie Explorer App — React.js (JSX), JavaScript, HTML, Tailwind CSS

Browse upcoming, popular and top-rated movies, watch trailers, view cast details, and add favorites.

Tic-Tac-Toe Game — React.js, JavaScript, HTML, CSS

Interactive tic-tac-toe game with real-time updates and clean component-based structure.

Face Mask Detection System — Python, AI/Machine Learning

Computer vision project using OpenCV and CNN for real-time mask detection and classification.

Amazon Clone (Static Page) — HTML, CSS, JavaScript

Created a static replica of Amazon's homepage to practice responsive layouts and UI/UX fundamentals.

Technical Skills

Frontend: HTML, CSS, JavaScript (ES6+), React.js

Backend: Node.js, Express.js

Databases: MongoDB

Programming: C++, Python, OOP

Other: Git/GitHub, Machine Learning basics (OpenCV, TensorFlow)

Achievements

- Completed multiple self-driven MERN stack projects.
- Built and deployed a personal portfolio website.
- Strong foundation in OOP and problem-solving.
